

SACS Asbestos Plan Helps to Ensure Safe School Environment

February 1, 2018

Southwest Allen County Schools (SACS) has an ongoing asbestos management plan (AMP) in place designed to ensure a safe environment in all of the district schools. The EPA requires that all school districts identify all asbestos in their buildings and develop a plan to remove and/or maintain the asbestos in place. In accordance with Federal EPA regulations, SACS's AMP is available for public inspection in the district's Central Maintenance Building (4810 Homestead Road). The AMP details how asbestos, in the district schools, is being inspected, removed and/or maintained in place.

For more information, please contact Walt Todd, Director of Maintenance at 260-431-2080 or via Email at WTodd@sacs.k12.in.us.

Preparing today's learners for tomorrow's opportunities.
